EDUCATION

•Bachelor of Technology in Computer Science and Engineering

GPA: 8.59 / 10

K L (Deemed to be) University, Hyderabad

May 2023 - July 2027

- Specialization: **Cloud Infrastructure Services**
- Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Software Engineering & Agile Practices, Programming in Java & Python

EXPERIENCE

•VaultofCodes.in

Remote

AI & Prompt Engineering Intern

Dec 2025 - Present

- Developing a Conversational AI chatbot using **Streamlit** and the **Together API**, enabling persona-driven responses and real-time voice interactions.
- Designing and refining structured prompts; conducting experiments to measure how tone, clarity, and length influence AI output behavior.
- Building Python-based utilities including a **Temperature Converter** and **Advanced Calculator** with intuitive UI integration and strong error handling.

PROJECTS

•HireNest | [LINK](#)

A web platform enabling discovery and booking of trusted local service providers with real-time engagement.

- Implemented **smart search** (location, skills, ratings, price), reducing provider discovery time by **40%**.
- Built backend with **Node.js** + **MongoDB**, boosting data efficiency by **50%**.
- Deployed **real-time notifications** with Firebase Cloud Messaging, raising booking response rates by **50%**.

•Scan2Hire | [LINK](#)

A static food service website offering menu details, ordering features, reviews, and a visually rich gallery.

- **Developed** a multi-page platform using **HTML** and **CSS**, organizing **6+ sections** (Home, About, Menu, Gallery, Reviews, Order) for smooth navigation.
- **Structured** the interface with clear food categories, increasing menu discoverability by **50%** and reducing browsing time by **18 seconds**.
- **Enhanced** responsiveness and layout flow, improving user engagement by **40%** across **desktop, tablet, and mobile** views.

•ReFoodify | [LINK](#)

A smart food donation platform that connects donors, restaurants, and NGOs to reduce food wastage.

- **Engineered** a real-time donation workflow using the **Google Maps API**, boosting pickup accuracy and coordination by **60%**.
- **Designed** an intelligent **auto-routing system** that reduced NGO assignment time by **45%**.
- **Developed** a responsive interface and stable backend using **HTML**, **CSS**, **JavaScript**, **Node.js**, and **MySQL**, improving overall platform efficiency by **50%**.

TECHNICAL SKILLS AND INTERESTS

Programming Languages: C, C++, Java, Python, JavaScript, HTML, CSS

Core CS Concepts: Data Structures and Algorithms, Operating Systems, Computer Networks, Kernel level basics, Multithreading and concurrency, Compiler design basics, Compiler fundamentals, Digital logic design fundamentals

AI and Machine Learning: PyTorch model building, ML pipelines, AI API integration, Basic model optimization, Data preprocessing, Model evaluation

Libraries and Frameworks: Flask, React, Next, Tailwind, Bootstrap

Development Tools: Node, Git, GitHub, VSCode, Eclipse, IntelliJ IDEA

Cloud and Databases: AWS Cloud Foundations, OCI AI Foundations, MongoDB, PostgreSQL, MySQL

Areas of Interest: AI and ML, GPU computing, System software, Web development, Cloud computing, Data science

Soft Skills: Self learning, Presentation, Teamwork, Strategic planning, Precision, Communication

CERTIFICATIONS

•**Certified Advanced Automation Professional — Automation Anywhere**

- Practiced building simple automation bots using Automation Anywhere tools.
- Explored basic RPA concepts, task automation steps, and bot execution workflows.

•**Oracle Certified Associate**

- Studied core database topics including tables, queries, and relational structures.
- Gained familiarity with SQL commands for data retrieval and manipulation.

•**AWS Academy Graduate — Cloud Foundations**

- Understood the purpose of AWS services such as EC2, S3, VPC, and IAM.
- Built awareness of cloud principles involving virtualization, storage models, and security basics.

•**Microsoft Certified: Azure Fundamentals (AZ-900)**

- Achieved the Microsoft Azure Fundamentals certification, demonstrating strong foundational knowledge of cloud concepts.
- Gained hands-on understanding of Azure services, security, governance, and cloud architecture.
- Motivated to further explore advanced Azure solutions and grow in the cloud ecosystem.
